EDUCATION

University College London Sept. 2026–Jun. 2029
Computer Science BSc

Altrincham Grammar School for Boys Sept. 2018–Jul. 2025
A–Levels

- Mathematics (A*), Computer Science (A*), Further Mathematics (A), Physics (A)

GCSE

- 9 GCSEs grades 9–8 including Mathematics (9), Sciences (9), French (9), Electronics (9)

AWARDS AND COMPETITIONS

Samsung Solve for Tomorrow UK winner (16–18) Jan. 2025–Jul. 2025

- Pitched SanoBand, an ML-based mobile system detecting alcohol cravings and triggering real-time interventions; led 100+ user studies; awarded £10,000 by Samsung ([link](#))

Institute for Research in Schools – Best Research Project • CERN Atlas ML Study Dec. 2023–Jun. 2024

- Applied LSTM Recurrent Neural Networks to classify Higgs Boson events using LHC collision data (97% test accuracy); published as the best IRIS Research Project 2024

AFS–BP Global STEM Academies – China Scholar Feb. 2023–Aug. 2023

- Selected from top 3% of candidates worldwide; four-week funded STEM programme in China and twelve-week Global Citizenship certification (University of Pennsylvania CSIS), focusing on intercultural relations

TECHNICAL PROJECTS

3D Graphics Renderer (C++) Mar. 2025–Jul. 2025

- Built a real-time 3D wireframe renderer from scratch in C++/SDL2; implemented custom vector and matrix types, an OBJ mesh parser, model-view-projection transforms and backface culling

Tract – Missing Persons Finder for Crisis Zones Jul. 2025–Jul. 2025

- Developed a decentralised missing persons network for crisis zones designed to use P2P Bluetooth discovery; shipped core UI and mapping layer in React within a 48 hour hackathon ([landing.page](#))

Research paper – Caius Explore Competition • Cambridge University Mar. 2024–Jul. 2024

- Co-Authored a winning paper applying Shor's Algorithm to break elliptic-curve cryptography, and assessing BB84 and entangled-photon QSDC as post-quantum alternatives ([paper](#))

European Astro Pi Challenge – ESA/Raspberry Pi Foundation Dec. 2022–May. 2023

- Wrote a Python experiment that ran on the ISS, logging orientation-sensor data to model relativistic time dilation in orbit; reached the final phase (294 of ~770 teams reached); built a C++ app visualising relativistic wavelength shift using data from findings ([project](#))

EXPERIENCE

Data Systems Coordinator – SimplyTajweed Sept. 2025–Present

- Maintain records for 250+ students and 25+ classes; standardise annual student data intake, process and store records, and build automations to reduce admin processing from 8+ hours to ~2 using Python, Excel.

Founder – Convyio • Redwood Founders After Hours (Batch 1) Jun. 2026–Aug. 2026

- One of 20 teams selected for Redwood's 8-week O→I incubator; mentored by YC, EF alumni; built and launched Convyio, a team chat where AI coding agents work alongside humans as teammates

Arabic Reading Teacher – Bayaan Academy • WMA Sept. 2024–Jul. 2026

- Taught a class of 30 adults and two classes of ~15 children; design structured lessons, tailor methods to varied ages and learning paces, and set personalised goals with ongoing feedback

Private Tutor Aug. 2021–May. 2023

- Tutored 11+ and GCSE students 1–1 in Mathematics, Chemistry, Biology and Physics; students went on to achieve grades 7–9 at GCSE
